1. This Office action is in response to amendment filed 2 September 2006, which papers have been placed of record in the file.

2. Claims 9-22 are allowed over the prior art of record. The following is a statement of reasons for the indication of allowable subject matter:

Claim 11 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a method of controlling the actuator in a hard drive assembly comprising the digital voltage command is described by the formula as claimed, as presented in the environment of claim 11. It is noted that the closest prior art, Abe et al., shows a similar method of controlling the actuator in a hard drive assembly. However, Abe et al. fails to disclose the digital voltage command is described by the formula as claimed.

Claim 13 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a velocity-controlled actuator in a hard drive assembly comprising a digital processing engine for receiving a target actuator voltage command and the digital actuator motor voltage sample and for outputting a digital voltage command for controlling the actuator motor, as presented in the environment of claim 13. It is noted that the closest prior art, Brito et al., shows velocity-controlling the actuator by sampling the actuator voltage, processing the sample for generating a digital voltage command,

and applying the digital voltage command to control the actuator voltage. However, Brito et al. fails to disclose a digital processing engine as claimed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L. Habermehl whose telephone number is (571)272-7556. The examiner can normally be reached on 8:30-5:00.
